

WORLD PHARMACIST DAY

Unity College of Pharmacy annually commemorates World Pharmacists Day on September 25th, an event established by the International Pharmaceutical Federation (FIP) to acknowledge the indispensable role of pharmacists in global healthcare. The observance emphasizes the improvement of health outcomes, the promotion of safe medication practices, and the recognition of pharmacists as accessible healthcare providers who contribute to patient care through vaccinations and health education. The purpose of this celebration is to commend pharmacists' significant contributions, enhance public awareness of their duties, and advocate for their central position within healthcare systems. Commemorative activities include awareness initiatives, educational programs, and events that underscore pharmacists' functions in delivering health guidance, managing chronic illnesses, and facilitating access to essential medicines. All B.Pharmacy and M.Pharmacy students, in conjunction with the faculty, shall participate in these celebrations.
